

Unlock your Epic EHR data with our advanced search tool available on the App Orchard

INTRODUCING:

Critical Query

Designed for Pharmaceutical, Medical Device Manufacturers, and Healthcare Institutions

Tired of wasting time sifting through patient data with limited search capabilities and an inability to reach doctors notes?

BraidedData's* Critical Query for Healthcare Professionals is a super powered EHR investigation tool designed specifically for deep navigation of complex EHRs.

Get real time access to critical patient insights, vital signs, medical history, medications, lab results, imaging, diagnosis, procedures, nutritional data. Purpose-built reporting and automated extractions save time so you can focus on what's important.

Critical Query is fast, affordable, secure (HIPAA compliant) and accurate so you can spend more time on research/patient needs and less time and money fumbling through patient records.

AVAILABLE IN EPIC'S APP STORE: 'THE APP ORCHARD'

Critical Query is available in EPIC's App Orchard. A vetted and approved application store of powerful apps meeting EPIC's strict quality and compatibility guidelines.

ABOUT BRAIDED DATA

BraidedData is an innovative data science and technology company harnessing the power of AI to dramatically improve and accelerate document investigation and data processing for highly regulated (data sensitive) industries. It's proprietary AI powered Smart Target technologies are helping healthcare and legal professionals process and navigate complex records and data faster and more efficiently, saving hundreds of hours of time that's better spent providing care and legal services.

FEATURES AND BENEFITS

FASTER SEARCH

Dramatically reduce the workflow (time) to access the data

REDUCED LABOR COST

No need to develop custom SQL data queries

ACCELERATED QUERIES

Direct integration with Epic EHRs

INCREASED DATA REACH

Including doctors notes and typically unsearchable fields

PURPOSE BUILT REPORTING

Focused data report configurations

IMPROVED REPORTING

Automate search features to improve reporting

SUCCESS STORIES

"By deploying Critical Query across our hospital we anticipate a 50% reduction in developer labor and eliminate the 7-10 day wait times to create custom data queries for our users"

Hospital Administrator - Oregon

"Using Critical Query with a customized reporting attributes list for our patient drug trial registry will ensure quality reporting at a fraction of the time/cost"

Pharmaceutical Study Liaison - Massachusetts
